

MORA SAN 400

General Specifications:

MORA SAN 400 is bright weight matt emulsion paint, manufactured from vinyl acetate co-polymer resins, titanium dioxide and highly-smooth filling materials.

Uses: MORA SAN 400 is used for new and old, cement and gypsum surfaces

Technical Characteristics: (at 25 ° C):

Color	White
Density	1.5 ± 0.05 kg/L
Initial Drying	20 - 30 minutes
Time: Final Drying	60 minutes
Time: Dilution:	Diluted according to need with pure water
Consumption Rate	4 - 5 m ² / kg

How to Use:

- Surfaces should be cleaned well from dust, oils, grease or any other contaminations.
- Cavities should be filled and surfaces must be smoothed. One or more coats of MORA COAT 100 diluted with water can be painted.
- Paint one or more coats of MORA SAN 400 according to the surface permeability.

N.B. To avoid color deviation from one batch to another, only use the same batch number in the same area, In the case of necessity to work with a different batch, apply one package and the color is checked before working with the rest of the quantity.

Storage: For one year under proper storing conditions

Packs: 20 kg
